Disinfection Applications COVID-19 defense & containment

**ON-DEMAND
DISINFECTION**
GETS THE DOSE CLOSE

MoonBeam3 is highly effective anywhere dangerous bacteria and viruses lurk, and is uniquely designed for maximum versatility. Its three articulating arms can be positioned vertically, horizontally and angled, allowing the dose to get close or at a distance up to 7 feet. Incredibly easy to use and operate, it's also lightweight and highly portable to allow for disinfection when and where it's needed. With proven efficacy of up to a 6-log reduction (99.9999)*, third-party testing on several microorganisms including enveloped viruses, small non-enveloped viruses, bacteria and bacterial spores have been performed using MoonBeam3, and demonstrated a significant log reduction in pathogens. This efficacy data demonstrates the effectiveness of the MoonBeam3 device on pathogens that are more difficult to kill than enveloped viruses such as SARS-CoV-2. Used in the world's leading hospitals to reduce the spread of HAIs (healthcare-associated infections) such as MRSA, VRE, MDR-Gram negative, norovirus and *C. diff* spores, its unique design and powerful 254-nanometer wavelength is ideal for anything – from tight spaces to whole room disinfection, and is used in a variety of applications.

TESTIMONIALS

"THE MOONBEAM3 DEVICE IS A NOVEL TECHNOLOGY THAT IS EFFECTIVE FOR SAFE AND RAPID DISINFECTION."

- Curtis J. Donskey, MD*

*Infectious Diseases, Case Western Reserve University and Louis Stokes Cleveland Veterans Affairs Medical Center, Cleveland Ohio

"MOONBEAM3 HAS BEEN VERY EFFECTIVE TO KEEP OUR EMERGENCY RESPONDERS AND PATIENTS SAFE. OUR PARAMEDICS USE CHEMICAL CLEANERS IN CONJUNCTION WITH UV-C AFTER ALL HIGH RISK TRANSPORTS TO FULLY DISINFECT VEHICLES WITHIN 15 MINUTES. BECAUSE IT'S LIGHT AND PORTABLE, WE HAVE USED IT IN OUR FIRE STATION, POLICE DEPARTMENT AND DISPATCH CENTER TO IMPROVE SAFETY FOR ALL AND TO BETTER MANAGE RISKS."

- John Desmarteau, Assistant Chief
Middleburg Heights Fire Department

"MOONBEAM3 IS A GREAT TOOL. THE UV LIGHT FINDS ALL THE SPOTS WE MISS DURING OUR MANUAL WIPE DOWNS, PLUS WE CAN FLIP THE ARMS UPSIDE DOWN TO DOSE THE CEILINGS, COMPLETELY DISINFECTING THE BACK OF AN AMBULANCE IN A MATTER OF SIX MINUTES. WE HAVE DISINFECTED WELL OVER 450 AMBULANCES AND POLICE CARS IN A THREE WEEK PERIOD. IT'S REALLY HELPING TO KEEP STAFF SAFE."

- Nick DiCicco, Director, Chagrin Valley Regional Dispatch Center & Paramedic/Firefighter, Orange Village Fire Department
